23. Aims of programme			
<p><u>BSc Biological Sciences (Wildlife health Sciences)</u></p> <ul style="list-style-type: none"> • Produce graduates equipped to play a leading role in conservation as researchers, epidemiologists, academics and senior management in in-situ conservation programmes, national parks, zoological collections, universities and government departments worldwide • Produce high-calibre graduates who can proceed to study for higher research degrees <p><u>Placement Year</u></p> <ul style="list-style-type: none"> • To prepare students for the workplace through development of employability skills and understanding of the sector and organisation in which they are placed • To increase student employability by providing work and research experience with a placement provider • To provide students with a framework for lifelong learning • To provide opportunity to develop research skills, including synthesis of information, critical analysis and an appreciation of factors that contribute to uncertainties <p><u>MSci Biological Sciences (Wildlife health Sciences) Year</u></p> <ul style="list-style-type: none"> • Gain research experience within the field of wildlife health sciences. 			

- Gain a deep and systematic understanding of current questions, problems and methods employed within the selected specialised research topic
- Implement principles of project and experimental design and carefully execute, record and clearly disseminate research
- Use self-reflection to improve levels of knowledge, professionalism, personal skills and research skills
- Develop a sound appreciation of the research environment in which the student is working and their role within it

24. Overall Programme Level Learning Outcomes - the programme offers opportunities for students to achieve and demonstrate the following learning outcomes. Learning outcomes should be specified for all intermediate awards as well as for the terminal award.

On successful completion of the Bachelor of Science, students will be able to:	Modules in which each learning outcome will be developed and assessed:
<ul style="list-style-type: none"> • Have a detailed understanding of cell biology, physiology, and genetics 	Year 1 modules
<ul style="list-style-type: none"> • Have a detailed understanding of the basis of infectious & non-communicable diseases and • an appreciation of pharmacology and the broader applications for disease control 	Year 2 modules
<ul style="list-style-type: none"> • Display practical skills including the ability to design and execute experiments, analyse and interpret the resultant data, and present conclusions in a variety of formats. 	Year 2 Project
<ul style="list-style-type: none"> • Have developed the ability to access appropriate information, make methodical observations on the normal and abnormal functioning of biological systems, discriminate between important and relatively unimportant information and observations, reflect on information and observations, and solve problems, and discuss uncertainty in relation to scientific “facts”, and balance different schools of thought. 	Projects

<ul style="list-style-type: none"> Develop independent and lifelong learning skills to promote their own personal and professional development 	Tutorials & Skills Workshops (across all modules)
<ul style="list-style-type: none"> Develop important employability skills including: Communication, Teamwork, Personal management and career planning, effective learning, Problem-solving, digital literacy, numeracy 	Across all modules, with particular emphasis in projects and tutorials
<ul style="list-style-type: none"> Act with integrity, be honest, fair and compassionate in all their work. Maintain high ethical principles in relation to professional dealings, the use of information and experimentation in humans and animals 	Projects
<ul style="list-style-type: none"> Have an appreciation of health and safety appropriate to laboratory and field work, including completion and understanding of risk assessment and COSHH documents, 	Projects
<ul style="list-style-type: none"> Be able to assess the range of options available to practically intervene in wild animal health, and evaluate the practical limitations of a set of options 	Applied Wildlife Health Sciences
<ul style="list-style-type: none"> Be able to explain the basics of ecological theory and apply it to a range of wildlife health situations 	Ecology: Individuals, Populations & Communities
<p>On successful completion of the Placement Year, students will additionally be able to:</p>	
<ul style="list-style-type: none"> Employ models of reflection to explore and critically evaluate how these influence own learning, personal and professional planning; providing recommendations and action plan to improve 	Professionalism and Project modules
<ul style="list-style-type: none"> Demonstrate experience within the biological sciences that is relevant to their degree 	Professionalism and Project modules
<ul style="list-style-type: none"> Demonstrate an appreciation of the sector in which the student is working, a broad knowledge of the field, and their role within it 	Professionalism and Project modules
<ul style="list-style-type: none"> Devise, interrogate and sustain arguments using scholarly sources and the accurate deployment of established techniques of analysis and enquiry within one topic. 	Professionalism and Project modules
<ul style="list-style-type: none"> Demonstrate an appreciation of uncertainties and limits of knowledge 	Professionalism and Project modules
<p>On successful completion of the Master in Science, students will additionally be able to:</p>	

Clearly communicate their project aims, background, results, relevance and own proposals for future research, demonstrating critical analysis and a deep and systematic knowledge and understanding of the literature.	Research Skills module
Clearly and properly record their research.	Research Skills module & Project
Demonstrate excellent professional conduct.	Project
Identify specific areas for personal and skill development.	Research Skills module
25. Teaching/learning methods	Approximate total number of hours per week over X many weeks?
Lectures	8 -10 hours per week
Practical Classes	8 -10 hours per week
Tutorials and self-directed learning	5 hours per week
Placement Year	35 hours per week
Research project (year 4)	20 hours per week
26. Assessment methods	Percentage of total assessment load
Coursework	BSc: 22% BSc with Placement Year: 20% MSci: 20% MSci with Placement Year: 20%
Written Exams	BSc: 45% BSc with Placement Year: 40% MSci: 33% MSci with Placement Year: 30%
Research Project	BSc: 33% BSc with Placement Year: 40% MSci: 47% MSci with Placement Year: 50%
27. Feedback	
In each module in each year, there are a number of formative feedback opportunities. These include written formative feedback on individual coursework, online quizzes with answers, group question and answer sessions, feedback to the year group about exam and ICA performance, feedback to individual students about exam and ICA performance (in one-to-one tutorials). Students are encouraged to seek feedback from lecturers and tutors as needed during all small group learning and practical classes. Frequent opportunities for formative feedback (oral and written) during projects.

31. Programme structures and requirements, levels, modules, credits and awards

NB: Students planning more than a Stage ahead should be aware that the College will not deliver any module or part of a programme if circumstances have changed to threaten its quality or viability. Such offerings could change after a student has started the course. However, the College will always offer alternatives that will be of equal cost in both fees and add-on expenses to the student and of equal academic value.
